Whisper & clients - building new markets.

Building & garden landscaping marketing

Whisper & clients - building new markets together.

We help our smaller clients to develop new markets by writing and implementing their marketing plans. While our larger clients can draw on our experience to make their marketing plans as cost effective as possible.

Whisper have the experience to create persuasive concepts that enable your brand to communicate clearly to prospects, clients and staff.

Our work includes digital designs, html emails, social media and websites as well as advertising, corporate comms, direct marketing, exhibition graphics and print.

And as we don't have the same costly overheads as other ad agencies, we can produce a wider range of creative routes for you to consider, for less of your budget. It's that simple.

For over 20 years we've provided joined-up marketing solutions for companies of every shape and size, from start ups and entrepreneurs to corporations and NGO's.

We believe working in partnership with our clients enables us to produce compelling marketing ideas - both online and offline - and because of this collaborative approach, our clients return to us time and time again.

We work extensively, but not exclusively, with clients in:

- Building & Landscape Design
- CAD/CAM • Exhibitions • Food & Drink • Healthcare
- Legal Services • Logistics • NGO's & Charities

To see how we can help drive your brand forward simply call Brian on 020 8527 3222 or email him on info@whisper-cc.com

Whether your bathroom needs refreshing, a complete rework or you'd like to create a luxury wet room, we can help.

Under floor heating is a great idea to ensure your toes are cosy and warm all year round. Like a powerful shower to invigorate you and a luxurious bath to relax in, are both essential components.

A modern contemporary feel or a more classic look, the bathroom is the perfect room to express yourself.

We work extensively (but not exclusively) in:

If I said that good fences make good neighbours - they also make a safe environment for children and pets.

To make the most of your garden you could consider installing either decking or a patio. This will enable you to enjoy your garden all year round.

The benefits of a patio include durability, easy maintenance and a wide range of styles available to suit your taste. The benefits of a deck can often be a quicker and easier construction process. But whichever you choose, we'll build you a garden you can feel at home in.

Landscape Management & Design Consultants

tNIGELne

Nigel J Thorne Landscape Consultants is a practice concerned with the preservation, management and creation of fine landscapes.

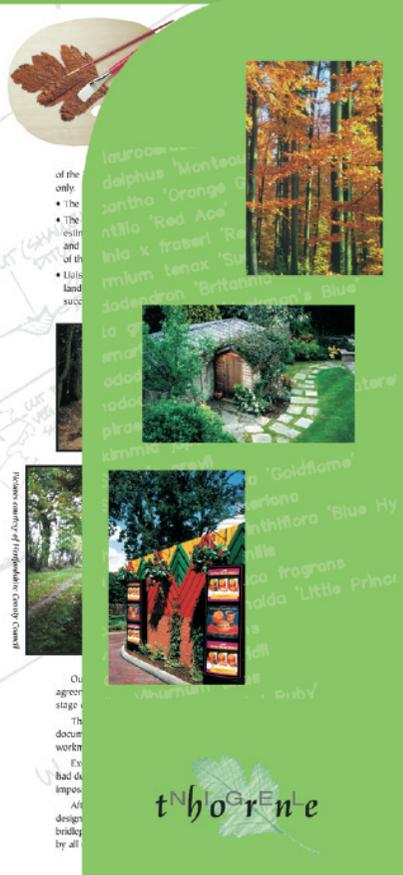

Our work includes the assessment of existing landscapes in terms of structure, planting and land use, ensuring both sustainability and survival.

Our landscape creation work encompasses designs for a wide range of uses: residential, commercial & industrial, highways, amenity & open spaces and sports facilities.

The practice also offers a quantity surveying service on behalf of landscape contractors, to assist in the compilation of tenders for specific landscape and contract works.

We use the latest 'Computer Aided Design', with specific landscape management packages, such as NBS landscape, as well as the usual office-based software.

Nigel J Thorne Landscape Consultants is a registered practice of The Landscape Institute, with all members of the practice registered as members or associates.

Rural Regeneration

Working in close co-operation with Hertfordshire County Council (HCC), the Green Lanes Restoration Project was based around the need to restore public access to large sections of routes classified as 'bridleways open to all traffic' (BOATs).

This pilot project proposed the reclassification and reinstatement of the BOATs for future use by pedestrians, cyclists and horse-riders only. The various stages of this project have encompassed:

- The initial site survey & assessment of the 23km of existing BOATs
- The preparation of plans and specifications, compilation of financial estimates for restoration and reinstatement, contract documentation and the letting of contracts for completion of the project.
- Liaison between the client (HCC) and landscape contractor to ensure the successful completion of the contract.

The project involved site visits and appraisals in all weather conditions to ensure the proposals would be sufficiently robust to withstand all seasonal variations.

Outline work programmes and restoration plans were prepared in agreement with all interested parties, including financial budgets for each stage of the project.

The commission also included contract management from documentation through to specification of materials and standards of workmanship.

Excessive use of the BOATs by mechanised vehicles (mainly 4x4s) had destroyed the access routes to the extent that it was almost impossible for pedestrians, cyclists and horse-riders to use them.

After reinstatement and a change of designated use for restricted access, the bridlepaths can now be accessed easily by all except motorised vehicles.

Special Projects

Our practice has been involved in a number of special projects involving the development and school grounds and playing fields. It is always important to work in conjunction with the individual school, teacher and staff, parents and most of all the children. It is essential that their local environment is high on the agenda, but it is essential that it be an added 'classroom' for learning.

The original play area had become overgrown and a specialist playground equipment was commissioned to develop the area for the children.

The gardens were designed to all of the hard landscape features finished structure a 'softer' texture and sense of 'secrecy' and desire to explore. The area was planted with shrub stock watered via a computerised irrigation establishment and the whole area was with fun and adventure.

Locally by Her Royal Highness The Duchess of York to be a great success.
